

Card network interface status

```
#!/bin/bash

interface=("ens160")

if [ -d "/sys/class/net/${interface[@]}" ]
then
    echo "Network card : '${interface[@]}' is exist "
    status=$(cat "/sys/class/net/${interface[@]}/operstate")

    if [ "$status" = "up" ]
    then
        echo "Network card status is up"
    else
        echo "Nework card status is down"
    fi
else
    echo "Network card : '${interface[@]}' is not exist "
fi
```

```
[root@dev adhamscripts]# vim interface_status_chk.sh
[root@dev adhamscripts]# chmod +x interface_status_chk.sh
[root@dev adhamscripts]# ./interface_status_chk.sh
Network card : 'ens160' is exist
Network card status is up
[root@dev adhamscripts]# █
```
